

Creative Rationale

Ide kami untuk tema visual Honda DIGICON 2026 mengacu pada beberapa value utama, yaitu:
Trust, innovation, people, engineering excellence, dan mobility
dengan look and feel ***optimis, intelligent, and human-centered***.

Ide tersebut kami implementasikan menjadi bahasa design dengan keywords:
HONDA DIGICON logo inspired, motion, connection, harmony, innovation
minimalist, premium, clean white, red, blue

The Passion behind the White Coveralls

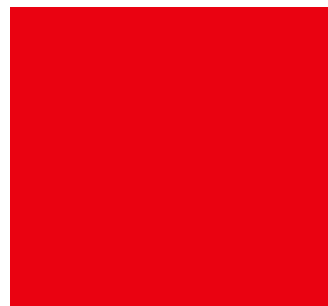

At Honda's R&D centers and factories, associates wear white work clothes that stain and smudge easily, from the philosophy that "good products come from clean workplaces." The white outfit also symbolizes the equality of all that work at Honda, including the CEO. White symbolizes Honda's philosophy for making products wholeheartedly not only in its Japanese facilities, but all over the world.

Honda Philosophy

The Honda Philosophy consists of Fundamental Beliefs (including "Respect for the Individual" and "The Three Joys"), the Company Principle, and Management Policies. This philosophy is not only shared by all associates, but also forms the basis for all company activities and sets the standard for the conduct and decision-making of all associates throughout the Honda Group. Driven by its dreams and reflecting its values, Honda will continue taking on challenges to share joys and excitement with customers and communities around the world to strive to become a company society wants to exist.
